

Jupio Power Vault 12000

JPV0040

User Manual

Thank you for purchasing this outstanding Jupio product. For optimal performance and safety, please read this instruction carefully before operating the product.

Power switch indication

Power On: Slide the sliding power switch to expose the USB port; the Power Vault is then powered on. And the power LED will display the power status.

Power Off: Slide the sliding power switch to cover the USB port and expose the micro USB port; the Power Vault is now powered off. Also the power LED are turned off now.

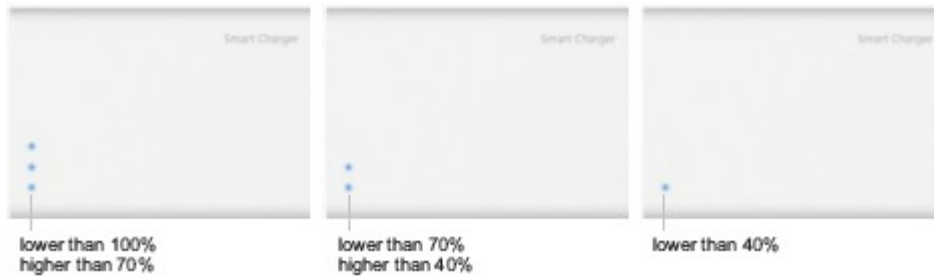

Remark: After the Power Vault is powered on and when no device is connected to the USB port, or if the connected smart phone/tablet is already fully charged, then the Power Vault will be powered off automatically to save energy. The power LED will be turned off as well. The Power Vault will then only restart charging if you move the slider again.

Power LED indication:

When computer or a Micro USB adapter is charging the Power Vault:

When the Power Vault is charging a phone, tablet or any other USB device:

Remark: When the Power Vault is out of power, the last LED will keep flashing for 5 times and then off, to remind you that it is out of power and needs to be recharged.

How to use

Charging your Power Vault

1. Charge the Power Vault via the supplied USB to Micro USB connector. The orange charging LED will appear on the display.
2. When all 3 charging indicators are glowing solid orange, charging is complete.

Charging USB plug device from Power Vault

1. Power on the Power Vault by sliding the power switch to expose the USB port.
2. Using your device's original USB charging cable to connect to smart charger's 1A or 2.1A USB output. Then the Power Vault's charging LED will be on, and your USB plug device would also indicate that it is being charged.
3. When your USB plug device is fully charged, disconnect the Power Vault.
4. Then power off the Power Vault by sliding the power switch.
If you don't power it off, then it will be automatically power off 2 minutes later to save energy.

Remark: If the Power Vault's 3 LEDs are all off after you power it on, it means the Power Vault is out of power, and needs to be recharged.
